Calibration Standard QC Report

Data File: C:\ICPCHEM\1\DATA\06F12p00.B\010CALS.D\010CALS.D#
Date Acquired: Jun 12 2006 04:30 pm
Acq. Method: 6020.M
Operator:
Sample Name: s3606
Misc Info:
Vial Number: 1107
Current Method: C:\ICPCHEM\1\METHODS\6020.M
Calibration File: C:\ICPCHEM\1\DATA\06D21K00.B\6020.C
Last Cal. Update: Jun 12 2006 04:28 pm
Sample Type: CalStd

This data package has been reviewed for technical correctness and completeness. Release of this data has been authorized by the Laboratory Manager or the Manager's designee, as verified by the following signatures. The results contained in this report meet all requirements of NELAC and pertain only to those samples which were submitted for analysis.

CASE NARRATIVE

Laboratory number:	**187112**
Client:	**Treadwell & Rollo**
Project:	**2893.04.51**
Location:	**Presidio**
Request Date:	**05/26/06**
Samples Received:	**05/26/06**

This hardcopy data package contains sample and QC results for seventeen water samples, requested for the above referenced project on 05/26/06. The samples were received cold and intact.

TPH-Purgeables and/or BTXE by GC (EPA 8015B and EPA 8021B):
No analytical problems were encountered.

TPH-Extractables by GC (EPA 8015B):
No analytical problems were encountered.

Volatile Organics by GC/MS (EPA 8260B):
No analytical problems were encountered.

Pesticides (EPA 8081A):
Low responses were observed for beta-BHC, delta-BHC, and 4,4'-DDE in the CCV analyzed 06/01/06 12:08; average CCV drift met method requirements. Low response was observed for 4,4'-DDE in the CCV analyzed 06/01/06 19:33; average CCV drift met method requirements. No other analytical problems were encountered.

Polynuclear Aromatics by HPLC (EPA 8310):
No analytical problems were encountered.

Metals (EPA 6010B, EPA 6020, and EPA 7470A) Water:
Low recoveries were observed for aluminum in the MS/MSD of 1065MW9B (lab # 187112-002); the BS/BSD were within limits. High RPD was also observed for aluminum; the RPD was acceptable in the BS/BSD, and this analyte was not detected at or above the RL in the associated sample. No other analytical problems were encountered.

Metals (EPA 6010B and EPA 6020) Filtrate:
Low recoveries were observed for aluminum in the MS/MSD of 1065MW9B (lab # 187112-002); the BS/BSD were within limits. High RPD was also observed for aluminum; the RPD was acceptable in the BS/BSD, and this analyte was not detected at or above the RL in the associated samples. The dissolved metals analysis for sample DW052506A (187112-013) was cancelled per J.Graber on 5/31/06. No other analytical problems were encountered.

Ion Chromatography (EPA 300.0):
No analytical problems were encountered.

Curtis & Tompkins, Ltd.

CASE NARRATIVE

Laboratory number:	**187112**
Client:	**Treadwell & Rollo**
Project:	**2893.04.51**
Location:	**Presidio**
Request Date:	**05/26/06**
Samples Received:	**05/26/06**

Total Cyanide (EPA 335.2):
Cal Science in Garden Grove, CA performed the analysis. Please see the Cal Science case narrative.

Total Oil & Grease (HEM) (EPA 1664A):
Matrix spikes were not performed for this analysis due to insufficient sample volume. No analytical problems were encountered.

Phenolic Compounds (EPA 420.1):
No analytical problems were encountered.

Alkalinity (EPA 310.1):
No analytical problems were encountered.

Sulfide (EPA 376.2):
No analytical problems were encountered.

Dissolved Sulfide (EPA 376.2):
The sulfide analysis for sample 1047MW101 (187112-014) was cancelled by J.Graber on 5/26/06; a properly preserved container was not provided from the field for this analysis. No analytical problems were encountered.

Total Dissolved Solids (TDS) (EPA 160.1):
No analytical problems were encountered.

pH (EPA 9040B):
No analytical problems were encountered.

COOLER RECEIPT CHECKLIST

Login#: 187112 Date Received: 5-26-06 Number of Coolers: 4
Client: Treadwell & Rollo Project: 2893

A. Preliminary Examination Phase
Date Opened: 5-26-06 By (print): Troy Windsor (sign) Troy Windsor

1. Did cooler come with a shipping slip (airbill, etc.)? ..... YES (NO)
   If YES, enter carrier name and airbill number: _____
2. Were custody seals on outside of cooler? ..... (YES) NO
   How many and where? 1 per over cooler lip Seal date: 5/25/06 Seal name: CS
3. Were custody seals unbroken and intact at the date and time of arrival? ..... (YES) NO
4. Were custody papers dry and intact when received? ..... (YES) NO
5. Were custody papers filled out properly (ink, signed, etc.)? ..... (YES) NO
6. Did you sign the custody papers in the appropriate place? ..... (YES) NO
7. Was project identifiable from custody papers? ..... (YES) NO
   If YES, enter project name at the top of this form.
8. If required, was sufficient ice used? Samples should be 2-6 degrees C. ..... (YES) NO
   Type of ice: Wet Temperature: 2.4 3.1 2.9 5.4

B. Login Phase
Date Logged In: 5-26-06 By (print): Troy Windsor (sign) Troy Windsor

1. Describe type of packing in cooler: Ziplock type bags
2. Did all bottles arrive unbroken? ..... (YES) NO
3. Were labels in good condition and complete (ID, date, time, signature, etc.)? ..... (YES) NO
4. Did bottle labels agree with custody papers? ..... (YES) NO
5. Were appropriate containers used for the tests indicated? ..... (YES) NO
6. Were correct preservatives added to samples? ..... (YES) NO
7. Was sufficient amount of sample sent for tests indicated? ..... (YES) NO
8. Were bubbles absent in VOA samples? If NO, list sample Ids below ..... (YES) NO
9. Was the client contacted concerning this sample delivery? ..... YES NO
   If YES, give details below.
   Who was called? _____ By whom? _____ Date: _____

Comment :
Method : \\Gcmsserver\DD\chem\MSVOA10.i\051506.b\826GOX10.m
Meth Date : 16-May-2006 09:16 Erik
Quant Type: ISTD
Cal Date : 15-MAY-2006 23:01
Cal File: JEF20.D
Als bottle: 20
Calibration Sample, Level: 9
Dil Factor: 1.00000
Integrator: HP RTE
Compound Sublist: all.sub
Target Version: 4.10
Processing Host: PC_MSVOA_WK01

Concentration Formula: Amt * DF * Uf/Vo * CpndVariable

Name	Value	Description
DF	1.000	Dilution Factor
Vo	5.000	Sample Volume purged (mL)
Uf	5.000	ng unit correction factor
Cpnd Variable		Local Compound Variable

JOM 6/1/06

0.025 mL of surrogate solution was added to all samples
0.025 mL of matrix spike solution was added to all spikes
☑ Samples continuously extracted with about 450 mL of CH_2Cl_2
Extraction Start Time: 1500
Extraction End Time: 0920
☐ Samples were extracted 3 times with 60 mL of CH_2Cl_2
Extracts filtered through baked, CH_2Cl_2 rinsed ~~powdered~~ granular Na_2SO_4
Exchanged 2x with Hexane
Concentrated: ☑ to volumes as noted above ☐ to clean-up volume
Clean-up (if necessary): ☐ GPC (see GPC run log) ☐ Florisil

Calibration Table

==========

NEW ICAL FOLLOWING REPLACEMENT OF UV LAMP. JM 22MAY2006

HPLC04 METHOD 8310

Calib. Data Modified : 5/22/2006 4:16:03 PM

Calculate : External Standard
Based on : Peak Area

Rel. Reference Window : 1.000 %
Abs. Reference Window : 0.200 min
Rel. Non-ref. Window : 1.000 %
Abs. Non-ref. Window : 0.250 min
Do not use Multiplier & Dilution Factor with ISTDs
Uncalibrated Peaks : not reported
Partial Calibration : Yes, identified peaks are recalibrated
Correct All Ret. Times: No, only for identified peaks

Curve Type : Linear
Origin : Ignored
Weight : Equal

Recalibration Settings:
Average Response : Average all calibrations
Average Retention Time: Floating Average New 75%

Calibration Report Options :
Printout of recalibrations within a sequence:
Calibration Table after Recalibration
Normal Report after Recalibration
If the sequence is done with bracketing:
Results of first cycle (ending previous bracket)

Subject: **Calscience Work Order No.: 06-05-1818**
Client Reference: 187112

Dear Client:

Enclosed is an analytical report for the above-referenced project. The samples included in this report were received 5/31/2006 and analyzed in accordance with the attached chain-of-custody.

Unless otherwise noted, all analytical testing was accomplished in accordance with the guidelines established in our Quality Systems Manual, applicable standard operating procedures, and other related documentation. The original report of any subcontracted analysis is provided herein, and follows the standard Calscience data package. The results in this analytical report are limited to the samples tested and any reproduction thereof must be made in its entirety.

If you have any questions regarding this report, please do not hesitate to contact the undersigned.

Sincerely,

Calscience Environmental
Laboratories, Inc.
Jason Torres

Case Narrative for 06-05-1818

Sample Condition on Receipt

One aqueous sample was received as part of this Work Order on May 31, 2006. The sample was transferred to the laboratory in an ice-chest following strict chain-of-custody procedures. The temperature (5.1°C) of the sample was measured upon arrival in the laboratory and was within acceptable limits. The sample was logged into the Laboratory Information Management System (LIMS), given a laboratory identification number, and stored in refrigeration units pending analysis.

Tests Performed

Testing was performed in accordance to the chain-of-custody instructions. The following tests were performed on the sample as requested:

Total Cyanide by EPA 335.2

Data Summary

Holding Times

All holding time requirements were met.

Calibration

Frequency and control criteria for initial and continuing calibration verifications were met.

Blanks

The method blank data showed non-detectable levels for all constituents.

Calscience
Environmental
Laboratories, Inc.

Case Narrative for 06-05-1818

Laboratory Control Samples

The Laboratory Control Sample (LCS) and Laboratory Control Sample Duplicate (LCSD) analyses were performed at the required frequencies. All recoveries were within acceptable limits.

Glossary of Terms and Qualifiers

Work Order Number: 06-05-1818

Qualifier	Definition
*	See applicable analysis comment.
1	Surrogate compound recovery was out of control due to a required sample dilution, therefore, the sample data was reported without further clarification.
2	Surrogate compound recovery was out of control due to matrix interference. The associated method blank surrogate spike compound was in control and, therefore, the sample data was reported without further clarification.
3	Recovery of the Matrix Spike or Matrix Spike Duplicate compound was out of control due to matrix interference. The associated LCS and/or LCSD was in control and, therefore, the sample data was reported without further clarification.
4	The MS/MSD RPD was out of control due to matrix interference. The LCS/LCSD RPD was in control and, therefore, the sample data was reported without further clarification.
5	The PDS/PDSD associated with this batch of samples was out of control due to a matrix interference effect. The associated batch LCS/LCSD was in control and, hence, the associated sample data was reported with no further corrective action required.
A	Result is the average of all dilutions, as defined by the method.
B	Analyte was present in the associated method blank.
C	Analyte presence was not confirmed on primary column.
E	Concentration exceeds the calibration range.
H	Sample received and/or analyzed past the recommended holding time.
J	Analyte was detected at a concentration below the reporting limit and above the laboratory method detection limit. Reported value is estimated.
N	Nontarget Analyte.
ND	Parameter not detected at the indicated reporting limit.
Q	Spike recovery and RPD control limits do not apply resulting from the parameter concentration in the sample exceeding the spike concentration by a factor of four or greater.
U	Undetected at the laboratory method detection limit.
X	% Recovery and/or RPD out-of-range.
Z	Analyte presence was not confirmed by second column or GC/MS analysis.

CASE NARRATIVE

Laboratory number:	**187137**
Client:	**Treadwell & Rollo**
Project:	**2893.04.51**
Location:	**Presidio**
Request Date:	**05/30/06**
Samples Received:	**05/30/06**

This hardcopy data package contains sample and QC results for one water sample, requested for the above referenced project on 05/30/06. The sample was received cold and intact.

TPH-Purgeables and/or BTXE by GC (EPA 8015B):
No analytical problems were encountered.

TPH-Extractables by GC (EPA 8015B):
No analytical problems were encountered.

Volatile Organics by GC/MS (EPA 8260B):
No analytical problems were encountered.

Pesticides (EPA 8081A):
High response was observed for methoxychlor in the ICV analyzed 06/05/06 20:45; average ICV drift met method requirements, and this analyte was not detected at or above the RL in the associated samples. No other analytical problems were encountered.

Polynuclear Aromatics by HPLC (EPA 8310):
No analytical problems were encountered.

Metals (EPA 6010B, EPA 6020, and EPA 7470A):
Low recoveries were observed for aluminum in the MS/MSD of 1065MW9B (lab # 187112-002); the BS/BSD were within limits. High RPD was also observed for aluminum; the RPD was acceptable in the BS/BSD, and this analyte was not detected at or above the RL in the associated sample. No other analytical problems were encountered.

Ion Chromatography (EPA 300.0):
No analytical problems were encountered.

Alkalinity (EPA 310.1):
No analytical problems were encountered.

Total Dissolved Solids (TDS) (EPA 160.1):
No analytical problems were encountered.

COOLER RECEIPT CHECKLIST

Login#: 187137 Date Received: 5/30/06 Number of Coolers: 1
Client: Treadwell Project: Presidio

A. Preliminary Examination Phase
Date Opened: 5/30/06 By (print): John P. (sign) [signature]

1. Did cooler come with a shipping slip (airbill, etc.)? ..... YES NO
   If YES, enter carrier name and airbill number: _____
2. Were custody seals on outside of cooler? ..... YES NO
   How many and where? _____ Seal date: _____ Seal name: _____
3. Were custody seals unbroken and intact at the date and time of arrival? ..... YES NO N/A
4. Were custody papers dry and intact when received? ..... YES NO
5. Were custody papers filled out properly (ink, signed, etc.)? ..... YES NO
6. Did you sign the custody papers in the appropriate place? ..... YES NO
7. Was project identifiable from custody papers? ..... YES NO
   If YES, enter project name at the top of this form.
8. If required, was sufficient ice used? Samples should be 2-6 degrees C. ..... YES NO
   Type of ice: wet Temperature: on ice - No temp Ø

B. Login Phase
Date Logged In: 5/30/06 By (print): John P. (sign) [signature]

1. Describe type of packing in cooler: zip loc bags
2. Did all bottles arrive unbroken? ..... YES NO
3. Were labels in good condition and complete (ID, date, time, signature, etc.)? ..... YES NO
4. Did bottle labels agree with custody papers? ..... YES NO
5. Were appropriate containers used for the tests indicated? ..... YES NO
6. Were correct preservatives added to samples? ..... YES NO
7. Was sufficient amount of sample sent for tests indicated? ..... YES NO
8. Were bubbles absent in VOA samples? If NO, list sample Ids below ..... YES NO
9. Was the client contacted concerning this sample delivery? ..... YES NO
   If YES, give details below.
   Who was called? _____ By whom? _____ Date: _____

KR 8 JUN 06

	Mfg & Lot# / LIMS # / Time	Date/ Initials
0.5 mL of TEH_SURR was added to all samples	53417C	6/6/06 MJM
0.5 mL of TEH_SP was added to all spikes	53587D	
pH of all samples adjusted to pH ≤ 2 with H_2SO_4	FS054522	
☒ Samples were continually extracted about 450 mL of CH_2Cl_2	EM466110	
Extraction Start Time:	1535 / 1445 / 1645 6/6/06	
Extraction End Time:	1235 MJM 6/7/06	
☐ Samples were extracted 3 times with 60 mL of CH_2Cl_2	NA	6/8/06 KR
Extracts filtered through baked, CH2Cl2-rinsed granular Na2SO4	EM4S091549	
Concentrated to volumes as noted above	✓

Calibration Table

==========

NEW ICAL FOLLOWING REPLACEMENT OF UV LAMP. 22MAY2006

HPLC04 METHOD 8310

Calib. Data Modified : 5/22/2006 4:16:03 PM

Calculate : External Standard
Based on : Peak Area

Rel. Reference Window : 1.000 %
Abs. Reference Window : 0.200 min
Rel. Non-ref. Window : 1.000 %
Abs. Non-ref. Window : 0.250 min
Do not use Multiplier & Dilution Factor with ISTDs
Uncalibrated Peaks : not reported
Partial Calibration : Yes, identified peaks are recalibrated
Correct All Ret. Times: No, only for identified peaks

Curve Type : Linear
Origin : Ignored
Weight : Equal

Recalibration Settings:
Average Response : Average all calibrations
Average Retention Time: Floating Average New 75%

Calibration Report Options :
Printout of recalibrations within a sequence:
Calibration Table after Recalibration
Normal Report after Recalibration
If the sequence is done with bracketing:
Results of first cycle (ending previous bracket)

Signal 1: DAD1 A, Sig=254,4 Ref=480,80
Signal 2: DAD1 B, Sig=305,4 Ref=480,80
Signal 3: FLD1 A, Ex=273, Em=323, TT

RE: Presidio/2893

Dear Josh:

Enclosed are the results of the sample(s) submitted to our laboratory on March 11, 2006. For your reference, these analyses have been assigned our service request number D0600027.

All analyses were performed according to our laboratory's quality assurance program. The test results meet requirements of the NELAP standards except as noted in the case narrative report. All results are intended to be considered in their entirety, and Columbia Analytical Services, Inc. (CAS) is not responsible for use of less than the complete report. Results apply only to the items submitted to the laboratory for analysis and individual items (samples) analyzed, as listed in the report.

Please call if you have any questions. My extension is 123. You may also contact me via email at DBurnett@redding.caslab.com.

Respectfully submitted,

Columbia Analytical Services, Inc.

Douglas Burnett
Project Chemist

Updated 10/7/2005

Organic Department Qualifiers

Organic Sample ID Qualifiers

A This qualifier indicates that a TIC is a suspected aldol-condensation product

B Used when the analyte is found in the associated blank as well as the sample, indicating possible blank contamination. The data user should evaluate these compounds and their amounts carefully.

C The "C" flag indicates the presence of this compound has been confirmed by the GC/MS analysis.

D This qualifier is used for all the compounds identified in an analysis at a secondary dilution factor. "D" qualifiers are used only for the samples reported at more than one dilution factor.

E This flag indicates that the value reported exceeds the linear calibration range for that compound. Therefore, the sample should be reanalyzed at the appropriate dilution. The "E" qualified amount is an estimated concentration, and the results of the dilution will be reported on a separate Form I.

I The qualifier indicates that the reporting limit to the "I" qualifier has been raised. It is used when the chromatographic interference prohibits detection of a compound at a level below the concentration expressed on the Form I.

J Indicates an estimated value. It is used when the data indicates the presence of a target compound below the reporting limit or the presence of a Tentatively Identified Compound (TIC).

N This qualifier indicates presumptive evidence of a compound. This flag is only used for Tentatively Identified Compounds (TIC), where the identification is based on a mass spectral library research. It is applied to all TIC results. For generic characterization of a TIC, such as chlorinated hydrocarbon, the "N" qualifier is not used.

P This qualifier is used for target analytes when there is a greater than 40% difference for detected concentrations between the two columns or detectors. The concentration value is reported on Form I and flagged with a "P".

U Indicates the compound was analyzed for but not detected. The number adjacent to the "U" qualifier indicates the reporting limit for that compound. The reporting limit can vary from sample to sample depending on dilution factors or percent moisture adjustments when indicated.

Z Indicates an estimated value between the method detection limit and zero.

Organic Sample ID Qualifiers

These qualifiers may be appended to the Lab Sample ID and/or the Client Sample ID for organic analysis.

DL Diluted reanalysis. Indicates that the results were determined in an analysis of a secondary dilution of a sample or extract. A digit to indicate multiple dilutions of the sample or extract may follow the "DL" suffix. The results of more than one diluted reanalysis may be reported.

MS Matrix spike (may be followed by a digit to indicate multiple matrix spikes within a sample set).

MSD Matrix spike duplicate (may be followed by a digit as noted above in the MS explanation).

R Reanalysis. The extract was reanalyzed without re-extraction. The "R" is not used if the sample was also re-extracted. If followed by a digit, indicates multiple reanalysis of the sample at the same dilution.

RE Re-extraction analysis. The sample was re-extracted and reanalyzed. May be followed by a digit to indicate multiple re-extracted analysis of the same sample at the same dilution.

Inorganic Data Qualifiers
Cations

C (Concentration) Qualifier:

B -- The reported value obtained was less than the CRDL, but greater than or equal to the MDL/IDL.

U -- The value was less than the MDL/IDL or was not detected.

Q Qualifier:

E -- The reported value is estimate because of interference.

M -- Duplicate injection precision was not met. (Two analyses of the sample did not agree).

N -- Spiked sample recovery not within control limits.

S -- The reported value was determined by the Method of Standard Additions (MSA).

J -- Post digestion spike for Graphite Furnace AA analyses is out of control limits (85% - 115%), while sample absorbance is less than 50% of spike absorbance.

***** -- Duplicate analysis not within control limits.

+ -- Correlation coefficient for the MSA is less than 0.995.

M (Method) Qualifier:

P -- ICP

A -- Flame AA

F -- Furnace AA

CV -- Cold Vapor

AV -- Automated Cold Vapor

NR -- Analyte was not required

C -- Manual spectrophotometric

RRL (Reliable Reporting Limit):

RRL -- The reliable reporting limit was established to qualify analytical results for which no CRDL was Available, or did not apply. The RRL is a concentration approximately four times the Method Detection Limit (MDL).

Client: Treadwell and Rollo
Project: Presidio/2893

Service Request: D0600027

SAMPLE CROSS-REFERENCE

CASE NARRATIVE

COLUMBIA ANALYTICAL SERVICES, INC.

Client:	Treadwell and Rollo, Inc.	**Service Request No.:**	D0600027
Project:	Presidio of San Francisco	**Date Received:**	3/11/06
Sample Matrix:	Water		

CASE NARRATIVE

All analyses were performed consistent with the quality assurance program of Columbia Analytical Services, Inc. (CAS). This report contains analytical results for samples designated for Tier III validation deliverables.

Sample Receipt

Three water samples were received for analysis at Columbia Analytical Services on 3/11/06. No discrepancies were noted upon initial sample inspection. The samples were received in good condition and consistent with the accompanying chain of custody form. The samples were stored in a refrigerator at 4°C upon receipt at the laboratory.

Diesel/Motor Oil Range Organics by EPA Method 8015B

No anomalies associated with the analysis of these samples by the above-mentioned method were observed.

Gasoline Range Organics by EPA Method 8015B

No anomalies associated with the analysis of these samples by the above-mentioned method were observed.

BTEX by EPA Method 8021

No anomalies associated with the analysis of these samples by the above-mentioned method were observed.

Volatile Organic Compounds by EPA Method 8260B

Initial Calibration (ICAL) Exceptions:
The primary evaluation criterion was exceeded for the following analytes in ICAL ID 03/15/2006: Chloroethane and Acetone. In accordance with CAS standard operating procedures, the alternative evaluation specified in the EPA method was performed using the mean Relative Standard Deviation (RSD) of all analytes in the calibration. The result of the mean RSD calculation was 6.38%. The calibration meets the alternative evaluation criteria. Note that CAS/Redding policy does not allow the use of averaging if any analyte in the ICAL exceeds 40% RSD.

Elevated Method Reporting Limits:
Sample 950GW108CL required dilution due to the presence of elevated levels of target analyte. The reporting limits are adjusted to reflect the dilution.

Polynuclear Aromatic Hydrocarbons by EPA Method 8310

Continuing Calibration Verification (CCV) Exceptions:
The upper control criterion was exceeded for the following analytes in CCV I0325003 and I0325012 for the Fluorescence detector: Fluorene. The field samples analyzed in this sequence did not contain the analyte(s) in question. Fluorene met the acceptance criteria for the UV detector. Since the apparent problem equates to a potential high bias, the data quality is not affected. No further corrective action was required.

Matrix Spike Exceptions:
Insufficient sample volume was received to perform a Matrix Spike/Matrix Spike Duplicate (MS/MSD). A Laboratory Control Sample/Duplicate Laboratory Control Sample (LCS/DLCS) was analyzed in order to report precision data.

Cooler received on 03/11/2006 and opened on 3/11/06 by NCPham

1.	Were custody seals on outside of cooler?		Y	N	9. Did all bottle labels and tags agree with custody papers?	NA	Y N
2.	Were seals intact and signature & date correct?	NA	Y	N	10. Were the correct types of bottles used for the tests indicated?	NA	Y N
3.	Is the shipper's airbill available and filed?		Y	N	11. Were all of the preserved bottles received at the lab with the appropriate pH?	NA	Y N
4.	COC #				12. Were VOA vials checked for absence of air bubbles, and if present, noted below?	NA	Y N
5.	Were custody papers properly filled out (ink, signed, etc.)?	NA	Y	N	13. Did the bottles originate from CAS/D or a branch laboratory?		Y N
6.	Type of packing material present ice				14. Are CWA Microbiology samples received with >½ the 24 hr. hold time remaining from collection?	NA	Y N
7.	Did all bottles arrive in good condition (unbroken)?	NA	Y	N	15. Was Cl2/Res negative?	NA	Y N
8.	Were all bottle labels complete (*i.e.* analysis, preservation, etc.)?	NA	Y	N

Columbia Analytical Services INC.
An Employee - Owned Company

April 27, 2006

Mr. Josh Graber
Treadwell & Rollo, Inc.
555 Montgomery St., Suite 1300
San Francisco, CA 94111

RE: Presidio

Dear Josh:

Enclosed are the results of the samples submitted to our laboratory on March 29, 2006. For your reference, these analyses have been assigned our service request number DH005.

All analyses were performed according to our Laboratory's quality assurance program. The test results meet requirements of the NELAP standards except as noted in the case narrative report. All results are intended to be considered in their entirety, and Columbia Analytical Services, Inc. (CAS) is not responsible for use of less than the complete report. Results apply only to the items submitted to the laboratory for analysis and individual items (samples) analyzed, as listed in the report.

If you have any questions, please call me at (530) 244-5269.

Respectfully submitted,

Columbia Analytical Services, Inc.

Douglas Burnett
Project Manager

  Lab ID# C037
- State of Wisconsin, Department of Ecology
  Approved laboratory for Wastewater and Hazardous Waste
  Lab ID# 999767340

Updated 10/7/2005

Organic Department Qualifiers

Organic Sample ID Qualifiers

A This qualifier indicates that a TIC is a suspected aldol-condensation product

B Used when the analyte is found in the associated blank as well as the sample, indicating possible blank contamination. The data user should evaluate these compounds and their amounts carefully.

C The "C" flag indicates the presence of this compound has been confirmed by the GC/MS analysis.

D This qualifier is used for all the compounds identified in an analysis at a secondary dilution factor. "D" qualifiers are used only for the samples reported at more than one dilution factor.

E This flag indicates that the value reported exceeds the linear calibration range for that compound. Therefore, the sample should be reanalyzed at the appropriate dilution. The "E" qualified amount is an estimated concentration, and the results of the dilution will be reported on a separate Form I.

I The qualifier indicates that the reporting limit to the "I" qualifier has been raised. It is used when the chromatographic interference prohibits detection of a compound at a level below the concentration expressed on the Form I.

J Indicates an estimated value. It is used when the data indicates the presence of a target compound below the reporting limit or the presence of a Tentatively Identified Compound (TIC).

N This qualifier indicates presumptive evidence of a compound. This flag is only used for Tentatively Identified Compounds (TIC), where the identification is based on a mass spectral library research. It is applied to all TIC results. For generic characterization of a TIC, such as chlorinated hydrocarbon, the "N" qualifier is not used.

P This qualifier is used for target analytes when there is a greater than 40% difference for detected concentrations between the two columns or detectors. The concentration value is reported on Form I and flagged with a "P".

U Indicates the compound was analyzed for but not detected. The number adjacent to the "U" qualifier indicates the reporting limit for that compound. The reporting limit can vary from sample to sample depending on dilution factors or percent moisture adjustments when indicated.

Z Indicates an estimated value between the method detection limit and zero.

Organic Sample ID Qualifiers

These qualifiers may be appended to the Lab Sample ID and/or the Client Sample ID for organic analysis.

DL Diluted reanalysis. Indicates that the results were determined in an analysis of a secondary dilution of a sample or extract. A digit to indicate multiple dilutions of the sample or extract may follow the "DL" suffix. The results of more than one diluted reanalysis may be reported.

MS Matrix spike (may be followed by a digit to indicate multiple matrix spikes within a sample set).

MSD Matrix spike duplicate (may be followed by a digit as noted above in the MS explanation).

R Reanalysis. The extract was reanalyzed without re-extraction. The "R" is not used if the sample was also re-extracted. If followed by a digit, indicates multiple reanalysis of the sample at the same dilution.

RE Re-extraction analysis. The sample was re-extracted and reanalyzed. May be followed by a digit to indicate multiple re-extracted analysis of the same sample at the same dilution.

Inorganic Data Qualifiers
Cations

C (Concentration) Qualifier:

B -- The reported value obtained was less than the CRDL, but greater than or equal to the MDL/IDL.

U -- The value was less than the MDL/IDL or was not detected.

Q Qualifier:

E -- The reported value is estimate because of interference.

M -- Duplicate injection precision was not met. (Two analyses of the sample did not agree).

N -- Spiked sample recovery not within control limits.

S -- The reported value was determined by the Method of Standard Additions (MSA).

J -- Post digestion spike for Graphite Furnace AA analyses is out of control limits (85% - 115%), while sample absorbance is less than 50% of spike absorbance.

***** -- Duplicate analysis not within control limits.

+ -- Correlation coefficient for the MSA is less than 0.995.

M (Method) Qualifier:

P -- ICP

A -- Flame AA

F -- Furnace AA

CV -- Cold Vapor

AV -- Automated Cold Vapor

NR -- Analyte was not required

C -- Manual spectrophotometric

RRL (Reliable Reporting Limit):

RRL -- The reliable reporting limit was established to qualify analytical results for which no CRDL was Available, or did not apply. The RRL is a concentration approximately four times the Method Detection Limit (MDL).

Sample ID Cross-reference Table

CAS Lab Sample ID		Client Sample ID	Receive Date	Collect Date	Sample Matrix	Additional Description
FS = Field Sample; LCD = Lab Control Sample Duplicate; LCS = Lab Control Sample; NON = Non-Sample Type (Internal Admin); TB = Trip Blank

DH005005	FS	LF5GW104CL	03/08/06	03/07/06 13:45	Water	
DH005006	FS	1349MW102CL	03/08/06	03/07/06 15:45	Water	

The above lab sample ID's and cross reference information apply to samples as received by the laboratory. Modifiers to the lab sample ID may be added for internal tracking purposes. Any modified sample ID will be reflected in the appropriate case narrative only.

COLUMBIA ANALYTICAL SERVICES, INC.

Client:	Treadwell & Rollo	**Service Request No.:**	DH005
Project:	Presidio of San Francisco	**Date Received:**	3/8/06
Sample Matrix:	Water		

CASE NARRATIVE

All analyses were performed consistent with the quality assurance program of Columbia Analytical Services, Inc. (CAS). This report contains analytical results for samples designated for Tier III validation deliverables.

Sample Receipt

Six water samples, plus a trip blank, were received for analysis at Columbia Analytical Services on 3/8/06.

No discrepancies were noted upon initial sample inspection. The samples were received in good condition and consistent with the accompanying chain of custody form. The samples were stored in a refrigerator at 4°C upon receipt at the laboratory.

General Chemistry Parameters (160.1, 300.0, 310.1, 353.2, 354.1, 9060

Method Blank Exceptions:
The Total Dissolved Solids (TDS) Method Blank is above the RL of 20 mg/L with a value of 59 mg/L. Due to holding time constraints, the analysis was not rerun.
(NCF #WC-06023)

Lab Control Sample Exceptions:
The laboratory control sample and laboratory control duplicate are outside the Control Limits of 92-106%, with values of 106.3% and 123.3% respectively. Due to holding time constraints, the analysis was not rerun.
(NCF #WC-06023)

Method Reporting Limits:
The following samples required dilution due to the presences of elevated levels of target analytes.

- 1065PZ5ARCL, 610GW103CL and LF4GW103CL for Alkalinity and Chloride.
- 1065PZ5ARCL for Total Organic Carbon.
- 1047MW101CL, 1065PZ5ARCL, and LF4GW103CL for Total Dissolved Solids
- LF4GW103CL and 1349MW102CL for Sulfate.

The reporting limits are adjusted to reflect the dilutions.

Dissolved Metals

Lab Control Sample Exceptions:
The upper control criterion was exceeded for the following analyte in Laboratory Control Sample (LCS) LCSDW-0311: Antimony. The analyte in question was not detected in the associated field samples. The error associated with elevated recovery equates to a high bias. The sample data is not significantly affected. No further corrective action was appropriate.

Approved by: _____ **Date:** 4-29-06

Diesel Range Organics and Stoddard Solvent by EPA Method 8015B

Continuing Calibration Verification Exceptions:
The upper control criterion was exceeded for the following analytes in the ending Continuing Calibration Verification (CCV) G0406020 analyzed on 4/6/06: TPH-Diesel and Octacosane. The associated samples were reanalyzed on 4/8/06. Similar results were obtained for the ending CCV (failed high). This would indicate a possible matrix effect from the samples that is affecting the CCV result. Since the apparent problem equates to a potential high bias, the data quality is not affected. No further corrective action was required.

Lab Control Sample Exceptions:
Laboratory Control Sample DWB10313LCS was spiked with Diesel fuel only.

Gasoline Range Organics by EPA Method 8015B

No anomalies associated with the analysis of these samples by the above-mentioned method were observed.

BTEX by EPA Method 8021

No anomalies associated with the analysis of these samples by the above-mentioned method were observed.

Organochlorine Pesticides by EPA Method 8081A

Second Source Exceptions:
The upper control criterion was exceeded for the following analytes in Initial Calibration Verification (ICV) D0313016: Endrin Ketone. The field samples analyzed in this sequence did not contain the analyte in question. Since the apparent problem equates to a potential high bias, the data quality is not affected.

Surrogate Exceptions:
The control criteria were exceeded for the following surrogate in Laboratory Control Sample PWB10329LCS and Control Sample Duplicate PWB10329LCSD: Decachlorobiphenyl. The surrogate outlier is flagged accordingly. All target analyte recoveries were within acceptance criteria for the LCS and LCSD, indicating the analytical batch was in control. No further corrective action was appropriate.

The control criteria were exceeded for the following surrogates in 1349MW102CL and 1349MW102CLRE: Decachlorobiphenyl and Tetrachloro-m-xylene. Since the problem may indicate a potential bias in the analytical batch, all associated field samples were re-extracted and reanalyzed past the recommended hold time. Note the results for the field samples were comparable for both determinations, which indicates the problem with the initial analysis was restricted to the surrogate recovery. Therefore, the results from the original and the reanalysis are reported. The data is flagged to indicate the problem.

The control criteria were exceeded for the following surrogate in sample LF5GW104CL: Decachlorobiphenyl. The sample was re-analyzed and produced similar results. The surrogate outlier is flagged accordingly. The reanalysis is reported. No further corrective action was appropriate.

PCB Aroclors by EPA Method 8082

Surrogate Exceptions:
The control criteria were exceeded for the following surrogate in LCS PWB10313LCS: Decachlorobiphenyl. The associated spike recoveries of target compounds were in control, indicating the analysis was in control. The surrogate outlier is flagged accordingly. The data quality is not affected.

Approved by: _____ **Date:** 4-29-06

The specific project control criteria were exceeded for the following surrogates in sample LF4GW103CL and 1349MW102CL due to suspected matrix interferences: Decachlorobiphenyl and Tetrachloro-m-xylene. Both recoveries were within the in-house statistical control criteria. A re-extraction and reanalysis was performed 15 days past the recommended hold time and produced similar results. Note the results for the field samples were comparable for both determinations, which indicates the problem with the initial analysis was restricted to the surrogate recovery. Both sets of results are reported. An "RE" suffix is appended to the sample name to designate the results from the reanalysis. The data is flagged to indicate the problem.

Volatile Organic Compounds by EPA Method 8260B

No anomalies associated with the analysis of these samples by the above-mentioned method were observed.

Polynuclear Aromatic Hydrocarbons by EPA Method 8310

Continuing Calibration Verification Exceptions:
The upper control criterion was exceeded for the following analytes in Continuing Calibration Verification (CCV) I0325003 and I0325012 for the Fluorescence detector: Fluorene. The field samples analyzed in this sequence did not contain the analyte in question. Fluorene met the acceptance criteria for the UV detector. Since the apparent problem equates to a potential high bias, the data quality is not affected.

Surrogate Exceptions:
The control criteria were exceeded for the following surrogate in sample 1349MW02CL: Terphenyl-d14. Since the problem may indicate a potential bias in the analytical batch, the sample was re-extracted past the recommended holding time and reanalyzed to verify surrogate recovery. Surrogate recovery in the re-extracted sample was also biased low, indicating matrix effects. Therefore, the results from the original analysis are reported.

Matrix Spike Recovery Exceptions:
Insufficient sample volume was received to perform a Matrix Spike/Matrix Spike Duplicate (MS/MSD). A Laboratory Control Sample/Duplicate Laboratory Control Sample (LCS/DLCS) was analyzed in order to report precision data.

Total Sulfide (376.2)

This analytical test was subcontracted to our Kelso facility.

SAMPLE RECEIPT EXCEPTION REPORT

Issue Type Legend		
	1) Holding Time	SMO Technician / Date: NGPham 3/8/6
	2) Temperature	Project Chemist / Date: (B) 4-29-06
	3) COC/Label	Client Contact(s): —
	4) Container	
	5) Other	

Item #	Issue Type	DESCRIPTION
1	3/4	COC claims that 9 HCl containers were included for sample 1047MW101CL, but only 6 VOA vials were received w/o any indication of a preservative on the containers, will log in for 7 hold time
2	3/4	COC claims 3 HCl preserved containers were included for sample 1015P25ARCL but there is no indication of HCl preservation in the 3 vials; 3 vials is not adequate for both 8015G and BTEX/MTBE analysis
3	3/4	Sulfide samples were sent directly to Kelso, but not indicated on COC
4	3/4	only 3 VOA vials received for 610GW103CL, which is not adequate for both TPH(gas) and BTEX/MTBE
5	5	a split was taken and preserved for NO3AW analysis

An Employee - Owned Company

March 28, 2006 Service Request No: K0601866

Doug Burnett
CAS/Redding
5090 Caterpillar Road
Redding, CA 96003

RE: Presidio

Dear Doug:

Enclosed are the results of the sample(s) submitted to our laboratory on March 09, 2006. For your reference, these analyses have been assigned our service request number K0601866.

All analyses were performed according to our laboratory's quality assurance program. The test results meet requirements of the NELAC standards except as noted in the case narrative report. All results are intended to be considered in their entirety, and Columbia Analytical Services, Inc. (CAS) is not responsible for use of less than the complete report. Results apply only to the items submitted to the laboratory for analysis and individual items (samples) analyzed, as listed in the report.

Please call if you have any questions. My extension is 3376.

Respectfully submitted,

Columbia Analytical Services, Inc.

Gregory Salata, Ph.D.
Project Chemist

Acronyms

ASTM	American Society for Testing and Materials
A2LA	American Association for Laboratory Accreditation
CARB	California Air Resources Board
CAS Number	Chemical Abstract Service registry Number
CFC	Chlorofluorocarbon
CFU	Colony-Forming Unit
DEC	Department of Environmental Conservation
DEQ	Department of Environmental Quality
DHS	Department of Health Services
DOE	Department of Ecology
DOH	Department of Health
EPA	U. S. Environmental Protection Agency
ELAP	Environmental Laboratory Accreditation Program
GC	Gas Chromatography
GC/MS	Gas Chromatography/Mass Spectrometry
LUFT	Leaking Underground Fuel Tank
M	Modified
MCL	Maximum Contaminant Level is the highest permissible concentration of a substance allowed in drinking water as established by the USEPA.
MDL	Method Detection Limit
MPN	Most Probable Number
MRL	Method Reporting Limit
NA	Not Applicable
NC	Not Calculated
NCASI	National Council of the Paper Industry for Air and Stream Improvement
ND	Not Detected
NIOSH	National Institute for Occupational Safety and Health
PQL	Practical Quantitation Limit
RCRA	Resource Conservation and Recovery Act
SIM	Selected Ion Monitoring
TPH	Total Petroleum Hydrocarbons
tr	Trace level is the concentration of an analyte that is less than the PQL but greater than or equal to the MDL.

Inorganic Data Qualifiers

*	The result is an outlier. See case narrative.
#	The control limit criteria is not applicable. See case narrative.
B	The analyte was found in the associated method blank at a level that is significant relative to the sample result.
E	The result is an estimate amount because the value exceeded the instrument calibration range.
J	The result is an estimated concentration that is less than the MRL but greater than or equal to the MDL.
U	The compound was analyzed for, but was not detected ("Non-detect") at or above the MRL/MDL.
i	The MRL/MDL has been elevated due to a matrix interference.
X	See case narrative.

Metals Data Qualifiers

#	The control limit criteria is not applicable. See case narrative.
B	The result is an estimated concentration that is less than the MRL but greater than or equal to the MDL.
E	The percent difference for the serial dilution was greater than 10%, indicating a possible matrix interference in the sample.
M	The duplicate injection precision was not met.
N	The Matrix Spike sample recovery is not within control limits. See case narrative.
S	The reported value was determined by the Method of Standard Additions (MSA).
U	The compound was analyzed for, but was not detected ("Non-detect") at or above the MRL/MDL.
W	The post-digestion spike for furnace AA analysis is out of control limits, while sample absorbance is less than 50% of spike absorbance.
i	The MRL/MDL has been elevated due to a matrix interference.
X	See case narrative.
*	The duplicate analysis not within control limits. See case narrative.
+	The correlation coefficient for the MSA is less than 0.995.

Organic Data Qualifiers

*	The result is an outlier. See case narrative.
#	The control limit criteria is not applicable. See case narrative.
A	A tentatively identified compound, a suspected aldol-condensation product.
B	The analyte was found in the associated method blank at a level that is significant relative to the sample result.
C	The analyte was qualitatively confirmed using GC/MS techniques, pattern recognition, or by comparing to historical data.
D	The reported result is from a dilution.
E	The result is an estimate amount because the value exceeded the instrument calibration range.
J	The result is an estimated concentration that is less than the MRL but greater than or equal to the MDL.
N	The result is presumptive. The analyte was tentatively identified, but a confirmation analysis was not performed.
P	The GC or HPLC confirmation criteria was exceeded. The relative percent difference is greater than 40% between the two analytical results (25% for CLP Pesticides).
U	The compound was analyzed for, but was not detected ("Non-detect") at or above the MRL/MDL.
i	The MRL/MDL has been elevated due to a chromatographic interference.
X	See case narrative.

Additional Petroleum Hydrocarbon Specific Qualifiers

F	The chromatographic fingerprint of the sample matches the elution pattern of the calibration standard.
L	The chromatographic fingerprint of the sample resembles a petroleum product, but the elution pattern indicates the presence of a greater amount of lighter molecular weight constituents than the calibration standard.
H	The chromatographic fingerprint of the sample resembles a petroleum product, but the elution pattern indicates the presence of a greater amount of heavier molecular weight constituents than the calibration standard.
O	The chromatographic fingerprint of the sample resembles an oil, but does not match the calibration standard.
Y	The chromatographic fingerprint of the sample resembles a petroleum product eluting in approximately the correct carbon range, but the elution pattern does not match the calibration standard.
Z	The chromatographic fingerprint does not resemble a petroleum product.

Case Number:

COLUMBIA ANALYTICAL SERVICES, INC.

Client:	Treadwell and Rollo, Inc.	**Service Request No.:**	K0601866
Project:	Presidio	**Date Received:**	03/09/06
Sample Matrix:	Water		

CASE NARRATIVE

All analyses were performed consistent with the quality assurance program of Columbia Analytical Services, Inc. (CAS). This report contains analytical results for samples designated for Tier III validation deliverables including summary forms and all of the associated raw data for each of the analyses. When appropriate to the method, method blank results have been reported with each analytical test.

Sample Receipt

Five water samples were received for analysis at Columbia Analytical Services on 03/09/06. The samples were received in good condition and consistent with the accompanying chain of custody form. The samples were stored in a refrigerator at 4°C upon receipt at the laboratory.

General Chemistry Parameters

Sulfide, Total by EPA Method 376.2:
The matrix spike recovery of total sulfide for sample 1047MW101CL was outside control criteria because of suspected matrix interference. A Matrix Spike Duplicate (MSD) was also analyzed, but produced similar results. Recovery in the Laboratory Control Sample (LCS) was acceptable, which indicates the analytical batch was in control. The matrix spike outlier suggests a potential low bias in this matrix. The results of the original analysis are reported. No further corrective action was appropriate.

No other anomalies associated with the analysis of these samples were observed.

SHORT HOLD TIME

Project/Client _____ Service Request K06 01866

Cooler received on 3/9/06 and opened on 3/9/06 by _____

1. Were custody seals on outside of coolers? FX Y (N)
   If yes, how many and where? _____
2. Were custody seals intact? ~~Y N~~
3. Were signature and date present on the custody seals? ~~Y N~~
4. Is the shipper's airbill available and filed? If no, record airbill number: _____ (Y) N
5. COC#
   Temperature of cooler(s) upon receipt: (°C) 1.6
   Temperature Blank: (°C) N/P
   Were samples hand delivered on the same day as collection? ~~Y N~~
6. Were custody papers properly filled out (ink, signed, etc.)? ~~Y~~ N
7. Type of packing material present ICE
8. **Did all bottles arrive in good condition (unbroken)?** (Y) N
9. Were all bottle labels complete (i.e analysis, preservation, etc.)? ~~Y~~ N
10. Did all bottle labels and tags agree with custody papers? ~~Y~~ N
11. **Were the correct types of bottles used for the tests indicated?** ~~Y~~ N
12. Were all of the preserved bottles received at the lab with the appropriate pH? (Y) N
13. Were VOA vials checked for absence of air bubbles, and if present, noted below? ~~Y N~~
14. Were the 1631 Mercury bottles checked for absence of air bubbles, and if present, noted below? ~~Y N~~
15. Did the bottles originate from CAS/K or a branch laboratory? Y (N)
16. **Are CWA Microbiology samples received with >1/2 the 24hr. hold time remaining from collection?** ~~Y N~~
17. Was C12/Res negative? ~~Y N~~

DATA QUALITY REPORT
INORGANICS

Explain any "no" responses to questions below, and any corrective actions in the comments section below.

1.	Is the method name and number correct and appropriate?	yes/no/NA
2.	Holding times met for all analyses and for all samples?	yes/no/NA
3.	Are calculations correct?	yes/no/NA
4.	Is the reporting basis correct? (Dry Weight)	yes/no/NA
5.	All quality control criteria met?	yes/no/NA
a.	Is the calibration curve correlation coefficient ≥ 0.995?	yes/no/NA
b.	MBs, CCVs, CCBs, LCSs, Dups, and Spikes, analyzed at proper frequency?	yes/no/NA
c.	Are ICVs, CCVs, and CCBs all within acceptance limits?	yes/no/NA
d.	Are results for methods blanks all ND?	yes/no/NA
e.	Are all QC samples within acceptance criteria? (LCS % rec, MS/DMS % rec, DUP or MS/DMS RPDs, etc.)	yes/no/NA
f.	Are all exceptions explained?	yes/no/NA
6.	Are all service requests that apply attached?	yes/no/NA
7.	Are all samples labelled correctly?	yes/no/NA
8.	Have all instructions on the service request been followed? (e.g. Special MRLs, QC on a specific sample)	yes/no/NA
9.	Are detection limits and units reported correctly?	yes/no/NA
10.	Are proper Analysis/Extraction stickers included on report?	yes/no/NA
11.	Is the unused space on the benchsheet crossed out?	yes/no/NA
12.	Was analysis turned in by the due date? (n-2) (If not record SR#)	yes/no/NA

DATA QUALITY REPORT
INORGANICS

Explain any "no" responses to questions below, and any corrective actions in the comments section below.

1. Is the method name and number correct and appropriate? yes/no/NA
2. Holding times met for all analyses and for all samples? yes/no/NA
3. Are calculations correct? yes/no/NA
4. Is the reporting basis correct (Dry Weight)? yes/no/NA
5. All quality control criteria met? yes/no/NA
   a. Is the calibration curve correlation coefficient ≥0.995? yes/no/NA
   b. MBs, CCVs, CCBs, LCSs, Dups, and Spikes analyzed at proper frequency? yes/no/NA
   c. Are ICVs, CCVs, and CCBs, all within acceptance limits? yes/no/NA
   d. Are results for method blanks all ND? yes/no/NA
   e. Are all QC samples within acceptance criteria? (LCS %Rec, MS/DMS %Rec, DUP or MS/DMS RPDs, etc.) yes/no/NA
   f. Are all exceptions explained? yes/no/NA
6. Are all service requests that apply attached? yes/no/NA
7. Are all samples labeled correctly? yes/no/NA
8. Have all instructions on the service request been followed? (e.g. Special MRLs, QC on a specific sample) yes/no/NA
9. Are detection limits and units reported correctly? yes/no/NA
10. Are proper Analytical Batch stickers included on report? yes/no/NA
11. Is the unused space on the benchsheet crossed out? yes/no/NA
12. Was analysis turned in by the due date (n-2)? If not, record SR#. yes/no/NA

RE: Presidio

Dear Josh:

Enclosed are the results of the samples submitted to our laboratory on March 30, 2006. For your reference, these analyses have been assigned our service request number DH009.

All analyses were performed according to our Laboratory's quality assurance program. The test results meet requirements of the NELAP standards except as noted in the case narrative report. All results are intended to be considered in their entirety, and Columbia Analytical Services, Inc. (CAS) is not responsible for use of less than the complete report. Results apply only to the items submitted to the laboratory for analysis and individual items (samples) analyzed, as listed in the report.

If you have any questions, please call me at (530) 244-5269.

Respectfully submitted,

Columbia Analytical Services, Inc.

Douglas Burnett
Project Manager

Updated 10/7/2005

Organic Department Qualifiers

Organic Sample ID Qualifiers

A This qualifier indicates that a TIC is a suspected aldol-condensation product

B Used when the analyte is found in the associated blank as well as the sample, indicating possible blank contamination. The data user should evaluate these compounds and their amounts carefully.

C The "C" flag indicates the presence of this compound has been confirmed by the GC/MS analysis.

D This qualifier is used for all the compounds identified in an analysis at a secondary dilution factor. "D" qualifiers are used only for the samples reported at more than one dilution factor.

E This flag indicates that the value reported exceeds the linear calibration range for that compound. Therefore, the sample should be reanalyzed at the appropriate dilution. The "E" qualified amount is an estimated concentration, and the results of the dilution will be reported on a separate Form I.

I The qualifier indicates that the reporting limit to the "I" qualifier has been raised. It is used when the chromatographic interference prohibits detection of a compound at a level below the concentration expressed on the Form I.

J Indicates an estimated value. It is used when the data indicates the presence of a target compound below the reporting limit or the presence of a Tentatively Identified Compound (TIC).

N This qualifier indicates presumptive evidence of a compound. This flag is only used for Tentatively Identified Compounds (TIC), where the identification is based on a mass spectral library research. It is applied to all TIC results. For generic characterization of a TIC, such as chlorinated hydrocarbon, the "N" qualifier is not used.

P This qualifier is used for target analytes when there is a greater than 40% difference for detected concentrations between the two columns or detectors. The concentration value is reported on Form I and flagged with a "P".

U Indicates the compound was analyzed for but not detected. The number adjacent to the "U" qualifier indicates the reporting limit for that compound. The reporting limit can vary from sample to sample depending on dilution factors or percent moisture adjustments when indicated.

Z Indicates an estimated value between the method detection limit and zero.

Organic Sample ID Qualifiers

These qualifiers may be appended to the Lab Sample ID and/or the Client Sample ID for organic analysis.

DL Diluted reanalysis. Indicates that the results were determined in an analysis of a secondary dilution of a sample or extract. A digit to indicate multiple dilutions of the sample or extract may follow the "DL" suffix. The results of more than one diluted reanalysis may be reported.

MS Matrix spike (may be followed by a digit to indicate multiple matrix spikes within a sample set).

MSD Matrix spike duplicate (may be followed by a digit as noted above in the MS explanation).

R Reanalysis. The extract was reanalyzed without re-extraction. The "R" is not used if the sample was also re-extracted. If followed by a digit, indicates multiple reanalysis of the sample at the same dilution.

RE Re-extraction analysis. The sample was re-extracted and reanalyzed. May be followed by a digit to indicate multiple re-extracted analysis of the same sample at the same dilution.

Inorganic Data Qualifiers
Cations

C (Concentration) Qualifier:

B -- The reported value obtained was less than the CRDL, but greater than or equal to the MDL/IDL.

U -- The value was less than the MDL/IDL or was not detected.

Q Qualifier:

E -- The reported value is estimate because of interference.

M -- Duplicate injection precision was not met. (Two analyses of the sample did not agree).

N -- Spiked sample recovery not within control limits.

S -- The reported value was determined by the Method of Standard Additions (MSA).

J -- Post digestion spike for Graphite Furnace AA analyses is out of control limits (85% - 115%), while sample absorbance is less than 50% of spike absorbance.

***** -- Duplicate analysis not within control limits.

+ -- Correlation coefficient for the MSA is less than 0.995.

M (Method) Qualifier:

P -- ICP

A -- Flame AA

F -- Furnace AA

CV -- Cold Vapor

AV -- Automated Cold Vapor

NR -- Analyte was not required

C -- Manual spectrophotometric

RRL (Reliable Reporting Limit):

RRL -- The reliable reporting limit was established to qualify analytical results for which no CRDL was Available, or did not apply. The RRL is a concentration approximately four times the Method Detection Limit (MDL).

Sample ID Cross-reference Table

CAS Lab Sample ID		Client Sample ID	Receive Date	Collect Date	Sample Matrix	Additional Description
FS = Field Sample; LCD = Lab Control Sample Duplicate; LCS = Lab Control Sample; NON = Non-Sample Type (Internal Admin); TB = Trip Blank						
DH009001	FS	LF01GW01CL	03/09/06	03/08/06 15:30	Water	
DH009002	FS	DAESP03CL	03/09/06	03/08/06 10:00	Water	
DH009003	FS	BB3SW104CL	03/09/06	03/08/06 13:30	Water	
DH009004	FS	231GW21CL	03/09/06	03/08/06 13:58	Water	

The above lab sample ID's and cross reference information apply to samples as received by the laboratory. Modifiers to the lab sample ID may be added for internal tracking purposes. Any modified sample ID will be reflected in the appropriate case narrative only.

COLUMBIA ANALYTICAL SERVICES, INC.

Client:	Treadwell & Rollo	**Service Request No.:**	DH009
Project:	Presidio of San Francisco	**Date Received:**	3/9/06
Sample Matrix:	Water		

CASE NARRATIVE

All analyses were performed consistent with the quality assurance program of Columbia Analytical Services, Inc. (CAS). This report contains analytical results for samples designated for Tier III validation deliverables.

Sample Receipt

Four water samples, plus a trip blank, were received for analysis at Columbia Analytical Services on 3/9/06.

No discrepancies were noted upon initial sample inspection. The samples were received in good condition and consistent with the accompanying chain of custody form. The samples were stored in a refrigerator at 4°C upon receipt at the laboratory.

General Chemistry Parameters (160.1, 300.0, 310.1, 353.2, 354.1, 9014, 9060)

Method Reporting Limits:
The following samples required dilution due to the presences of elevated levels of target analyte.

- LF01GW01CL, BB3SW104CL and 231GW21CL for Alkalinity.
- LF01GW01CL and BB3SW104CL for Chloride.
- LF01GW01CL, DAESP03CL and BB3SW104CL for Nitrate.
- DAESP03CL for Nitrite.

The reporting limits are adjusted to reflect the dilutions.

Total and Dissolved Metals (6010/6020)

Lab Control Sample Exceptions:
The upper control criterion was exceeded for the following analyte in Laboratory Control Sample (LCS) LCSW-0315 and in LCSDW-0315: Iron. Although the result exceeds the established upper control limit of 120%, it meets the laboratory's in-house control limit of 124%. The elevated recovery equates to a high bias. The sample data is not significantly affected.

Diesel Range Organics by EPA Method 8015B

Continuing Calibration Verification Exceptions:
The upper control criterion was exceeded for the following analytes in the ending Continuing Calibration Verification (CCV) G0406020 analyzed on 4/6/06: TPH-Diesel and Octacosane. The associated samples were reanalyzed on 4/8/06; similar results were obtained for the ending CCV, indicating possible matrix interference from the samples. Since the apparent problem equates to a potential high bias, the data quality is not affected.

Lab Control Sample Exceptions:
The Laboratory Control Sample DWB10314LCS was spiked with Diesel fuel only.

Approved by: _____ **Date:** 4-29-06

Sample Notes and Discussion:
Compounds were detected in sample 231GW21CL at the same elution time as Diesel fuel; however, the pattern of peaks did not match that of Diesel fuel. The pattern more closely resembles that of Stoddard Solvent.

Gasoline Range Organics by EPA Method 8015B

No anomalies associated with the analysis of these samples by the above-mentioned method were observed.

Organochlorine Pesticides by EPA Method 8081A

Second Source Exceptions:
The upper control criterion was exceeded for the following analytes in Initial Calibration Verification (ICV) D0313016: Endrin Ketone. The field samples analyzed in this sequence did not contain the analyte in question. Since the apparent problem equates to a potential high bias, the data quality is not affected.

Surrogate Exceptions:
The control criteria were exceeded for the following surrogate in Laboratory Control Sample PWB10329LCS and Control Sample Duplicate PWB10329LCSD: Decachlorobiphenyl. The surrogate outlier is flagged accordingly. All target analyte recoveries were within acceptance criteria for the LCS and LCSD, indicating the analytical batch was in control.

The control criteria were exceeded for the following surrogates in DAESP03CL and DAESP03CLRE: Decachlorobiphenyl and Tetrachloro-m-xylene. Since the problem may indicate a potential bias in the analytical batch, all associated field samples were re-extracted and reanalyzed past the recommended hold time. Note the results for the field samples were comparable for both determinations, which indicates the problem with the initial analysis was restricted to the surrogate recovery. Therefore, the results from the original and the reanalysis are reported.

PCB Aroclors by EPA Method 8082

Surrogate Exceptions:
The control criteria were exceeded for the following surrogate in LCS PWB10313LCS: Decachlorobiphenyl. The associated spike recoveries of target compounds were in control, indicating the analysis was in control. The surrogate outlier is flagged accordingly. The data quality is not affected. No further corrective action was taken.

The specific project control criteria were exceeded for the following surrogate in sample DAESP03CL due to suspected matrix interferences: Decachlorobiphenyl. The recovery was within the in-house statistical control criteria. A re-extraction and reanalysis was performed past the recommended hold time and produced similar result. Note the results for the field samples were comparable for both determinations, which indicates the problem with the initial analysis was restricted to the surrogate recovery. Both sets of results are reported. An "RE" suffix is appended to the sample ID to designate the results from the reanalysis.

Volatile Organic Compounds by EPA Method 8260B

Initial Calibration Exceptions:
The primary evaluation criterion was exceeded for the following analytes in Initial Calibration (ICAL) ID 03/15/2006: Chloroethane and Acetone. In accordance with CAS standard operating procedures, the alternative evaluation specified in the EPA method was performed using the mean Relative Standard Deviation (RSD) of all analytes in the calibration. The result of the mean RSD calculation was 6.38%. The calibration meets the alternative evaluation criteria. Note that CAS/Redding policy does not allow the use of averaging if any analyte in the ICAL exceeds 40% RSD.

Approved by: _____ **Date:** 4-29-06

Elevated Method Reporting Limits:
Sample 231GW21CL required dilution due to the presence of elevated levels of target analyte. The reporting limits are adjusted to reflect the dilution.

Polynuclear Aromatic Hydrocarbons by EPA Method 8310

Continuing Calibration Verification Exceptions:
The upper control criterion was exceeded for the following analytes in Continuing Calibration Verification (CCV) I0325003 and I0325012 for the Fluorescence detector: Fluorene. The field samples analyzed in this sequence did not contain the analyte in question. Fluorene met the acceptance criteria for the UV detector. Since the apparent problem equates to a potential high bias, the data quality is not affected. No further corrective action was required.

Matrix Spike Exceptions:
Insufficient sample volume was received to perform a Matrix Spike/Matrix Spike Duplicate (MS/MSD). A Laboratory Control Sample/Duplicate Laboratory Control Sample (LCS/DLCS) was analyzed in order to report precision data.

Total Sulfide and MBAS (376.2, 425.1)

The analytical results for these tests may be found in Service Request DH005.

Approved by: _____ **Date:** 4-29-06

CLE 3/14/06

Comments:

Sample DH009002 was very dirty, water got through so had to strain 3 times through sodium sulfate.

* DH009-2, -3, -4 logged in for MOIL - also. DMO LCS's and ms/msD was done on next set on same day. See bench sheet pg. 64. Those DMO LCS/ms/msD's will be for these MOIL samples as well.

Support Documentation

Liquid-Liquid Extraction, 3520C

Pesticide/PCB Water

Date	3-13-06
Time	16:00

Batches: DH005, DH008, DH009

Client(s): Presidio, EA/Andersen

Analytical Method(s)

- [x] 8081A
- [x] 8082
- [ ] CLP
- [ ] TCLP,1311

Solvent Lots

DCM	45348 3/16/13
Acetone	—
Hexane	45083 3/15/6

Spikes

Surrogate: 13 -EXS- 78A 3
Amt. 1.0 ml Exp: 3/15/06

Spike 1: 13 -EXS- 84A90
Amt. 1.0 ml Exp: 3/27/06

Spike 2: 13 -EXS- 86A
Amt. 1.0 ml Exp: 5/7/06

Spike 3: -EXS-
Amt. ml Exp:

Spiked by: [illegible] Witness: [illegible]

Cleanups

- [ ] GPC, 3640A — Calib: ; By/date: ; ID:

RE: Presidio

Dear Josh:

Enclosed are the results of the sample(s) submitted to our laboratory on May 26, 2006. For your reference, these analyses have been assigned our service request number D0600543.

All analyses were performed according to our laboratory's quality assurance program. The test results meet requirements of the NELAP standards except as noted in the case narrative report. All results are intended to be considered in their entirety, and Columbia Analytical Services, Inc. (CAS) is not responsible for use of less than the complete report. Results apply only to the items submitted to the laboratory for analysis and individual items (samples) analyzed, as listed in the report.

Please call if you have any questions. My extension is 104. You may also contact me via email at KSellers@redding.caslab.com.

Respectfully submitted,

Columbia Analytical Services, Inc.

Karen Sellers

Data Qualifiers for Organic Analyses

A -- This qualifier indicates that a Tentatively Identified Compound (TIC) is a suspected aldol-condensation product.

B -- This qualifier is used when the analyte is found in the associated blank as well as the sample, indicating possible blank contamination. The data user should carefully evaluate the qualified analyte and the reported concentrations.

C -- This qualifier indicates the presence of this compound has been confirmed by the GC/MS analysis.

D -- This qualifier is used for all the analytes identified in an analysis at a secondary dilution factor. "D" qualifiers are used only for the samples reported at more than one dilution factor.

E -- This qualifier indicates that the value reported exceeds the linear calibration range for that analyte. Therefore, the sample should be reanalyzed at the appropriate dilution. The "E" qualified amount is an estimated concentration, and the results of the dilution will be reported on a separate Form I.

J -- Indicates an estimated value. This qualifier is used when the data indicates the presence of a target analyte below the reporting limit or the presence of a Tentatively Identified Compound (TIC).

N -- This qualifier indicates presumptive evidence of an analyte. This flag is only used for Tentatively Identified Compounds (TIC) where the identification is based on a mass spectral library research. It is applied to all TIC results. For generic characterization of a TIC, such as a chlorinated hydrocarbon, the "N" qualifier is not used.

P -- This qualifier is used for target analytes when there is a greater than 40% difference for detected concentrations between the two columns or detectors. The concentration value is reported on Form I and flagged with a "P".

U -- Indicates the compound was analyzed for but not detected. The number adjacent to the "U" qualifier indicates the reporting limit for that compound. The reporting limit can vary from sample to sample depending on dilution factors or percent moisture adjustments when indicated.

DL -- Diluted reanalysis. "DL" indicates that the results were determined in an analysis of a secondary dilution of a sample or extract. A digit to indicate multiple dilutions of the sample or extract may follow the "DL" suffix. The results of more than one diluted reanalysis may be reported.

MS -- Matrix spike (may be followed by a digit to indicate multiple matrix spikes within a sample set).

MSD -- Matrix spike duplicate (may be followed by a digit to indicate multiple matrix spikes within a sample set).

R -- Reanalysis. The extract was reanalyzed without re-extraction. The "R" is not used if the sample was also re-extracted. It may be followed by a digit to indicate multiple reanalysis of the sample at the same dilution.

RE -- Re-extraction and reanalysis. The sample was re-extracted and reanalyzed. It may be followed by a digit to indicate multiple re-extracted analysis of the same sample at the same dilution.

Data Qualifiers for Metals and Wet Chemistry Analyses

B or **J**-- The reported value obtained was less than the MRL/CRDL, but greater than or equal to the MDL/IDL.

U -- The value was less than the MDL/IDL or was not detected.

E -- The reported value is estimate because of interference.

N -- Spiked sample recovery not within control limits.

ND -- Not detected at or above the MRL/CRDL.

* -- Duplicate analysis not within control limits.

CASE NARRATIVE

COLUMBIA ANALYTICAL SERVICES, INC.

Client:	Treadwell & Rollo, Inc.	**Service Request No.:**	D0600543
Project:	Presidio	**Date Received:**	5/26/06
Sample Matrix:	Water		

CASE NARRATIVE

All analyses were performed consistent with the quality assurance program of Columbia Analytical Services, Inc. (CAS). This report contains analytical results for samples designated for Tier III validation deliverables.

Sample Receipt

Five water samples were received for analysis at Columbia Analytical Services on 5/26/06.

The following discrepancies were noted upon initial sample inspection and documented on the cooler receipt/preservation form included in this data package:

- Inappropriate sample container provided for sulfide analysis. Sample must be collected in Sodium Hydroxide and Zinc Acetate-preserved container. A 250-ml portion of the sample from an unpreserved 1 liter bottle was preserved with the appropriate preservative at the lab at time of receipt.
- Although two volatile analyses were requested, 8260 and 8015-Gas, only 3 40-ml VOA vials were received for each sample. Ideally the lab requests that 3 vials per analysis be provided. Sample containers were split among the 2 analyses.

The samples were received in good condition and otherwise consistent with the accompanying chain of custody form. The samples were stored in a refrigerator at 4°C upon receipt at the laboratory.

General Chemistry Parameters

Elevated Method Reporting Limits:
The following samples required analyses on dilutions due to the presence of elevated levels of analytes.

- 1213GW101CL, 1349MW100CL, 1065MW9ACL and BHWGW01CL for Alkalinity and Chloride.
- 1213GW101CL and BHWGW01CL for Nitrate.
- 1349MW100CL and 1065MW9ACL for Total Dissolved Solids.
- 1213GW101CL for Sulfate.

Dissolved Metals

Lab Control Sample Exceptions:
The upper control criterion was exceeded for the following analyte in Laboratory Control Sample (LCS) LCSW-0602: Iron. The error associated with elevated recovery equates to a high bias, however, the recovery of 121% for Iron meets the laboratory's upper in-house control criterion of 124.9%. The sample data is not significantly affected. No further corrective action was appropriate.

Diesel Range Organics by EPA Method 8015B

Matrix Spike Recovery Exceptions:

Approved by: Karen Sellers **Date:** 7/6/06

Insufficient sample volume was received to perform a Matrix Spike/Matrix Spike Duplicate (MS/MSD). A Laboratory Control Sample/Duplicate Laboratory Control Sample (LCS/DLCS) was analyzed in order to report precision data.

Lab Control Sample and Relative Percent Difference Exceptions:
The control criteria for the following analyte TPH-Motor Oil in Laboratory Control and Duplicate Laboratory Control Samples DWB10531LCS and DWB10531LCSD are not applicable. Due to an error during the extraction process, lab control samples were only spiked with TPH-Diesel. However, all samples were analyzed for both target analytes. No further corrective action was appropriate.

Elevated Method Reporting Limits:
Sample 1349MW100CL required dilution due to the presence of elevated levels of target analyte. The reporting limits are adjusted to reflect the dilution.

Sample Notes and Discussion:
A silica gel clean up was performed on all samples prior to instrumental analysis per client request.

Gasoline Range Organics by EPA Method 8015B

No anomalies associated with the analysis of these samples by the above-mentioned methods were observed.

Organochlorine Pesticides by EPA Method 8081A

Surrogate Exceptions:
The control criteria were exceeded for the following surrogate in PWB10531LCS, PWB10531LCSD, and 1349MW100CL: Decachlorobiphenyl. Since the problem may indicate a potential bias in the analytical batch, all associated field samples were reanalyzed. The surrogates yielded similar results for the reanalysis. The second surrogate, Tetrachloro-m-xylene, met all quality control criteria in all samples. The target analytes met all quality control criteria in the Laboratory Control Sample, PWB10531LCS, and the Duplicate Laboratory Control Sample, PWB10531LCSD. Therefore, the results from the reanalysis are reported.

Volatile Organic Compounds by EPA Method 8260B

No anomalies associated with the analysis of these samples by the above-mentioned methods were observed.

Polynuclear Aromatic Hydrocarbons by EPA Method 8310

Surrogate Exceptions:
The surrogate recoveries for Samples D0600543-001 (1213GW101CL; 62%) and D0600543-002 (1349MW100CL; 42%) were below the project specific criteria of 65 – 135%. The sample -001 did meet the laboratory's in-house criteria of 44 – 116%. Surrogate recovery for the method blank as well as all recoveries for the LCS/LCSD met project control criteria (NCF #GC-06018).

Approved by: Karen Sellers **Date:** 7/6/06

An Employee - Owned Company

June 6, 2006 Service Request No: D0600543

Karen Sellers
Columbia Analytical Services
5090 Caterpillar Rd.
Redding, CA 96003

RE: Presidio

Dear Karen:

Enclosed are the results of the sample(s) submitted to our laboratory on May 26, 2006. For your reference, these analyses have been assigned our service request number D0600543.

All analyses were performed according to our laboratory's quality assurance program. The test results meet requirements of the NELAC standards except as noted in the case narrative report. All results are intended to be considered in their entirety, and Columbia Analytical Services, Inc. (CAS) is not responsible for use of less than the complete report. Results apply only to the items submitted to the laboratory for analysis and individual items (samples) analyzed, as listed in the report.

Please call if you have any questions. My extension is 3376.

Respectfully submitted,

Columbia Analytical Services, Inc.

for

Gregory Salata, Ph.D.
Project Chemist

Acronyms

ASTM	American Society for Testing and Materials
A2LA	American Association for Laboratory Accreditation
CARB	California Air Resources Board
CAS Number	Chemical Abstract Service registry Number
CFC	Chlorofluorocarbon
CFU	Colony-Forming Unit
DEC	Department of Environmental Conservation
DEQ	Department of Environmental Quality
DHS	Department of Health Services
DOE	Department of Ecology
DOH	Department of Health
EPA	U. S. Environmental Protection Agency
ELAP	Environmental Laboratory Accreditation Program
GC	Gas Chromatography
GC/MS	Gas Chromatography/Mass Spectrometry
LUFT	Leaking Underground Fuel Tank
M	Modified
MCL	Maximum Contaminant Level is the highest permissible concentration of a substance allowed in drinking water as established by the USEPA.
MDL	Method Detection Limit
MPN	Most Probable Number
MRL	Method Reporting Limit
NA	Not Applicable
NC	Not Calculated
NCASI	National Council of the Paper Industry for Air and Stream Improvement
ND	Not Detected
NIOSH	National Institute for Occupational Safety and Health
PQL	Practical Quantitation Limit
RCRA	Resource Conservation and Recovery Act
SIM	Selected Ion Monitoring
TPH	Total Petroleum Hydrocarbons
tr	Trace level is the concentration of an analyte that is less than the PQL but greater than or equal to the MDL.

Inorganic Data Qualifiers

*	The result is an outlier. See case narrative.
#	The control limit criteria is not applicable. See case narrative.
B	The analyte was found in the associated method blank at a level that is significant relative to the sample result.
E	The result is an estimate amount because the value exceeded the instrument calibration range.
J	The result is an estimated concentration that is less than the MRL but greater than or equal to the MDL.
U	The compound was analyzed for, but was not detected ("Non-detect") at or above the MRL/MDL.
i	The MRL/MDL has been elevated due to a matrix interference.
X	See case narrative.

Metals Data Qualifiers

#	The control limit criteria is not applicable. See case narrative.
B	The result is an estimated concentration that is less than the MRL but greater than or equal to the MDL.
E	The percent difference for the serial dilution was greater than 10%, indicating a possible matrix interference in the sample.
M	The duplicate injection precision was not met.
N	The Matrix Spike sample recovery is not within control limits. See case narrative.
S	The reported value was determined by the Method of Standard Additions (MSA).
U	The compound was analyzed for, but was not detected ("Non-detect") at or above the MRL/MDL.
W	The post-digestion spike for furnace AA analysis is out of control limits, while sample absorbance is less than 50% of spike absorbance.
i	The MRL/MDL has been elevated due to a matrix interference.
X	See case narrative.
*	The duplicate analysis not within control limits. See case narrative.
+	The correlation coefficient for the MSA is less than 0.995.

Organic Data Qualifiers

*	The result is an outlier. See case narrative.
#	The control limit criteria is not applicable. See case narrative.
A	A tentatively identified compound, a suspected aldol-condensation product.
B	The analyte was found in the associated method blank at a level that is significant relative to the sample result.
C	The analyte was qualitatively confirmed using GC/MS techniques, pattern recognition, or by comparing to historical data.
D	The reported result is from a dilution.
E	The result is an estimate amount because the value exceeded the instrument calibration range.
J	The result is an estimated concentration that is less than the MRL but greater than or equal to the MDL.
N	The result is presumptive. The analyte was tentatively identified, but a confirmation analysis was not performed.
P	The GC or HPLC confirmation criteria was exceeded. The relative percent difference is greater than 40% between the two analytical results (25% for CLP Pesticides).
U	The compound was analyzed for, but was not detected ("Non-detect") at or above the MRL/MDL.
i	The MRL/MDL has been elevated due to a chromatographic interference.
X	See case narrative.

Additional Petroleum Hydrocarbon Specific Qualifiers

F	The chromatographic fingerprint of the sample matches the elution pattern of the calibration standard.
L	The chromatographic fingerprint of the sample resembles a petroleum product, but the elution pattern indicates the presence of a greater amount of lighter molecular weight constituents than the calibration standard.
H	The chromatographic fingerprint of the sample resembles a petroleum product, but the elution pattern indicates the presence of a greater amount of heavier molecular weight constituents than the calibration standard.
O	The chromatographic fingerprint of the sample resembles an oil, but does not match the calibration standard.
Y	The chromatographic fingerprint of the sample resembles a petroleum product eluting in approximately the correct carbon range, but the elution pattern does not match the calibration standard.
Z	The chromatographic fingerprint does not resemble a petroleum product.

Case Narrative

COLUMBIA ANALYTICAL SERVICES, INC.

Client:	Treadwell and Rollo, Inc.	**Service Request No.:**	D0600543
Project:	Presidio	**Date Received:**	5/26/06
Sample Matrix:	Water		

CASE NARRATIVE

All analyses were performed consistent with the quality assurance program of Columbia Analytical Services, Inc. (CAS). This report contains analytical results for samples designated for Tier III validation deliverables including summary forms and all of the associated raw data for each of the analyses. When appropriate to the method, method blank results have been reported with each analytical test.

Sample Receipt

One water sample was received for analysis at Columbia Analytical Services on 5/26/06 in good condition and consistent with the accompanying chain of custody form. The sample was stored in a refrigerator at 4°C upon receipt at the laboratory.

General Chemistry Parameters

Sulfide, Total by EPA 376.2:
The matrix spike recovery of total sulfide for sample 1065MW9ACL was outside control criteria because of matrix interference. As a result, accurate quantitation was not possible. Recovery in the Laboratory Control Sample (LCS) was acceptable. No further corrective action was possible.

   Were samples hand delivered on the same day as collection? ~~Y~~ N
6. Were custody papers properly filled out (ink, signed, etc.)? (Y) N
7. Type of packing material present ICE, PLASTIC
8. **Did all bottles arrive in good condition (unbroken)?** (Y) N
9. Were all bottle labels complete (i.e analysis, preservation, etc.)? (Y) N
10. Did all bottle labels and tags agree with custody papers? (Y) N
11. **Were the correct types of bottles used for the tests indicated?** (Y) N
12. Were all of the preserved bottles received at the lab with the appropriate pH? ~~Y N~~
13. Were VOA vials checked for absence of air bubbles, and if present, noted below? ~~Y N~~
14. Were the 1631 Mercury bottles checked for absence of air bubbles, and if present, noted below? ~~Y N~~
15. Did the bottles originate from CAS/K or a branch laboratory? Y (N)
16. **Are CWA Microbiology samples received with >1/2 the 24hr. hold time remaining from collection?** ~~Y N~~
17. Was C12/Res negative? Y ~~N~~

Explain any discrepancies: _____

DATA QUALITY REPORT
INORGANICS

Explain any "no" responses to questions below, and any corrective actions in the comments section below.

1.	Is the method name and number correct and appropriate?		yes/no/NA
2.	Holding times met for all analyses and for all samples?		yes/no/NA
3.	Are calculations correct?		yes/no/NA
4.	Is the reporting basis correct? (Dry Weight)		yes/no/NA
5.	All quality control criteria met?		yes/no/NA
	a.	Is the calibration curve correlation coefficient ≥ 0.995?	yes/no/NA
	b.	MBs, CCVs, CCBs, LCSs, Dups, and Spikes, analyzed at proper frequency?	yes/no/NA
	c.	Are ICVs, CCVs, and CCBs all within acceptance limits?	yes/no/NA
	d.	Are results for methods blanks all ND?	yes/no/NA
	e.	Are all QC samples within acceptance criteria? (LCS % rec, MS/DMS % rec, DUP or MS/DMS RPDs, etc.)	yes/no/NA
	f.	Are all exceptions explained?	yes/no/NA
6.	Are all service requests that apply attached?		yes/no/NA
7.	Are all samples labelled correctly?		yes/no/NA
8.	Have all instructions on the service request been followed? (e.g. Special MRLs, QC on a specific sample)		yes/no/NA
9.	Are detection limits and units reported correctly?		yes/no/NA
10.	Are proper Analysis/Extraction stickers included on report?		yes/no/NA
11.	Is the unused space on the benchsheet crossed out?		yes/no/NA
12.	Was analysis turned in by the due date? (n-2) (If not record SR#)		yes/no/NA

COMMENTS:

5e. [redacted] 3MS/MSD failed at 26% + 25%.
Matrix interference suspected

ADDENDUM-D0600543

Dear Josh:

Enclosed is the amended data for the above-mentioned service request.

1. Run logs for anions (6/6/06 and 6/8/06 on instrument ICS-2000) are provided.
2. The Beryllium run log for the 10X dilution for sample D0600543-002 is provided (Form 14).
3. The Antimony and Silver run log for samples D0600543-001 through 004 is provided (Form 14).
4. The Carbon ranges for Diesel is C10-C20 and for Motor Oil is C20-C40.
5. The PEM data for Pesticide analysis for sample D0600543-002 is provided.
6. Calibration data for Acenaphthylene analyzed 6/28/06 on instrument LCI by Method 8310 is provided.

Columbia Analytical Services appreciates your business and looks forward to serving your future analytical needs. If you have any questions concerning the data or if you need additional information, please call me at (530) 244-5227 ex. 104.

Respectfully submitted,

Columbia Analytical Services, Inc.

Subject: PT GWM 2Q06 - CAS laboratory items - SDG D0600543

Hi Karen,

The following items were found during validation of the CAS data package for PT GWM 2Q06:

1. The run logs for anions analyses (6/6/06 and 6/8/06 on instrument ICS-2000) are missing from the data package.
2. The run log for the 10X dilution of sample D0600543-002 for beryllium is missing from the data package. Beryllium was analyzed on instrument ELAN 9000 on 6/8/06.
3. The run log for antimony and silver for samples D0600543-001 thru -004 is missing from the data package. Antimony and silver were analyzed on instrument ELAN 9000 on 6/14/06.
4. *The initial calibration data for mercury is missing from the data package; the sample was analyzed on 5/30/06 on instrument PE FIMS.
5. *The initial calibration data for selenium is missing from the data package; the samples were analyzed on 6/19/06 on instrument PE GFAA 5100.
6. Please verify the carbon ranges that were reported for TPH-diesel and motor oil in samples D0600543-001 through -003. The samples were analyzed on 6/10/06 and 6/11/06 on instrument GCF.
7. Please provide the PEM data for pesticides analysis for sample D0600543-002, analyzed on 6/14/06 on instrument GCD.
8. Calibration data was not provided for acenaphthylene by method 8310. The samples were analyzed on 6/28/06 on instrument LCI.

Thank you,
Lisa (DataVal, Inc.)

still need to get these for you.
Karen

RE: Presidio

AMENDMENT-D0600543

Dear Josh:

Enclosed is the amended data for the above-mentioned service request. The incorrect carbon ranges were used in quantitating diesel and motor oil. The data was requantitated so that the ranges indicated in the QAPP are used. In addition the RLs and units were modified to comply with the QAPP requirements.

Columbia Analytical Services appreciates your business and looks forward to serving your future analytical needs. If you have any questions concerning the data or if you need additional information, please call me at (530) 244-5227 ex. 104.

Respectfully submitted,

Columbia Analytical Services, Inc.
